Hopeful Heart Main Outcomes Presented at #ACC19

Hopeful Heart
TRIAL

Center Director Dr. Bruce Rollman presented the main outcomes of the Hopeful Heart Trial at the American College of Cardiology Meeting this weekend. After implementing a blended collaborative care model, he found that co-treating heart failure and depression improves quality of life.

Watch interviews and highlights from the Conference below!

Center Director Dr. Bruce Rollman is interviewed by Dr. Peter Block about blended collaborative care for treating heart failure and depression.

The Hopeful Heart Trial is included as one of four studies in the #ACC19 Day 1 highlights. Dr. Deepak Bhatt summarizes what he sees as the main message for cardiologists: "we should probably be caring more about depression than we do."
