A Visit to Facebook Reality Labs

facebook

Reality Labs

Last week the Center's Core Faculty visited Facebook

Reality Labs. Director Yaser Sheikh delivered the keynote address at our 4th Integrative Conference on Technology, Social Media, and Behavioral Health, and we went to the Labs to learn more about his field of work.

We demoed Oculus' newest standalone VR headset, available March 2019, and discussed future use cases in healthcare, including virtual therapy and surgical education.

We had fun playing VR games using hand controls. It was interesting to experience how sensors can incorporate our own body parts into the virtual world.

To learn more about the projects being conducted at Facebook Reality Labs and

Oculus, visit Oculus'
